

Dijana Niksic

Product & Project Manager

ABOUT

I'm a Product Manager and a Project Manager with a sharp analytical mindset and a passion for building products that make a real difference. From A/B testing and financial modeling to owning the product journey end-to-end, I love turning ideas into intuitive solutions. I work closely with cross-functional teams, adapt to Agile, Waterfall, or Hybrid approaches, and always aim for outcomes that truly matter.

WORK EXPERIENCE

● Project Manager - Kape Technologies (2025-Present)

- Led end-to-end localization projects for global VPN brands including ExpressVPN, CyberGhost, and Private Internet Access, ensuring high-quality and timely delivery across multiple markets.
- Managed cross-functional collaboration with product, marketing, and content teams to align localization with product releases, campaigns, and growth initiatives.
- Optimized translation workflows through process improvements and automation, increasing efficiency and reducing turnaround time.
- Coordinated multilingual content delivery at scale, maintaining consistency in brand voice, UX, and SEO performance.
- Managed vendor relationships, workload distribution, and quality assurance processes to maintain high standards across all deliverables.

● Product Manager - Webselenese (2022-2024)

- Led A/B testing initiatives to optimize product features, analyzing performance data to refine user experiences and boost customer engagement.
- Led operational projects that included financial modeling, resource allocation strategies, and cost optimization, achieving measurable improvements in resource efficiency.
- Developed and executed comprehensive product strategies, ensuring alignment with company goals, market trends, and customer needs, contributing to sustained product revenue growth. Managed and mentored a development team, ensuring timely delivery of product releases by maintaining rigorous quality standards and effective project tracking.
- Collaborated with marketing, engineering, and design stakeholders to align roadmaps and prioritize features based on user feedback and market trends.

● Technical Virtual Assistant - Website Planet (2021-2022)

- Managed and updated website content using WordPress CMS, ensuring consistency with brand identity and optimizing for SEO best practices.
- Created and scheduled engaging content across multiple social media channels, managed customer interactions, and fostered community engagement.
- Implemented automation tools to streamline content workflows and improve response time for customer inquiries, enhancing user satisfaction.

● Junior Frontend Developer - Emma's e-Commerce (2021-2021)

- Developed and maintained responsive, user-friendly front-end interfaces using HTML, CSS, and WordPress themes, focusing on cross-device and cross-browser compatibility.
- Collaborated closely with designers and backend developers to seamlessly integrate UI/UX designs into functional and engaging e-commerce websites.
- Conducted thorough testing and debugging to ensure smooth performance, improving user experience and minimizing errors across various browsers and devices.

EDUCATIONAL HISTORY

Product Management Professional Certificate (2025-Present)

[Show credential](#)

Issued by: IBM

Currently building expertise in product lifecycle management, from ideation to launch and iteration. Learning how to define product strategy, create roadmaps, and translate user needs into actionable requirements. Developing skills in market research, data-driven decision-making, and collaboration with engineering, design, and business stakeholders.

Certificate Foundations of Project Management (2024-2024)

[Show credential](#)

Issued by: Google

Developed a strong foundation in project management methodologies, including Agile and Waterfall frameworks. Learned how to define project scope, manage stakeholders, track progress, and mitigate risks using structured tools and processes. Applied concepts such as project planning, task prioritization, and cross-functional coordination to simulate real-world project execution.

Fullstack LevelUp Course (2022-2023)

[Show credential](#)

Issued by: Danilo Vesovic

Completed an intensive fullstack development program covering both frontend and backend fundamentals. Worked with modern web technologies (HTML, CSS, JavaScript, React, Node.js) to build and deploy functional web applications. Gained hands-on experience in database management, API integration, and version control, with a focus on writing clean, maintainable code and understanding end-to-end product architecture.

High School Diploma (2012-2016)

Acquired foundational knowledge in environmental science, including ecology, waste management, water and air quality control, and sustainability practices. Developed analytical and laboratory skills for monitoring environmental impact, along with an understanding of regulatory standards and environmental protection processes.

SKILLS

Product & Project Management

Product Strategy & Roadmapping • End-to-End Product Lifecycle • Agile / Waterfall / Hybrid Delivery • Stakeholder Management • Cross-functional Leadership • Go-to-Market Coordination • Backlog Prioritization • OKRs & KPI Tracking

Data & Analytics

A/B Testing & Experimentation • Data-Driven Decision Making • Performance Analysis • Financial Modeling • Cost Optimization • Tableau (Data Visualization) • Basic SQL mindset

Operations & Process Optimization

Workflow Automation • Process Improvement • Resource Allocation • Vendor Management • Localization Operations • Quality Assurance • Scalability & Efficiency Optimization

Technical & Tools

Jira • Asana • Trello • Monday.com • Slack • Figma • G-Suite • WordPress CMS • HTML/CSS/JavaScript (Foundations) • API & Backend Basics

Core Business Skills

Strategic Thinking • Problem Solving • Communication • Team Leadership • Time & Priority Management • Critical Thinking
